ABOUT ME

i am a mad webdeveloper who build websites that prioritize both aesthetic appeal and user-centric functionality. With a deep-rooted passion for computer science, I am committed to continuous learning and innovation in web development. My goal is to deliver high-quality, visually striking crazy websites that not only meet client objectives but also exceed user expectations, ensuring a seamless and engaging digital experience.

SKILLS

- MongoDB
- Expressjs
- Nodejs
- Reactjs
- Redux-toolkit
- React native
- Gsap
- Tailwind
- Next js
- Tanstack query
- Shadcn
- html,css,js,bootstrap,ejs,tessarta
ctjs,socket.io,multer,cloudinary,
cors,handlebars.

TOOLS

- Visual studio code
- Github
- Git
- React icons
- chatgpt
- Augment

EDUCATION

Bachlors of Computer Application

EXPERIENCE

FRONTEND DEVELOPER INTERN

PRNK-infotech-llp

Present (2025)

- I build responsive, high-performance UIs using Next.js, React Native, Tailwind CSS, and shadcn/ui.
- State and data are managed cleanly with Zustand and TanStack Query.
- My focus is on clean code, smooth UX, and scalable component architecture.

WEB DEVELOPER INTERN

6/5/25- 1/7/25

Goitdev Private Limited

- Developed responsive layouts using media queries and modern CSS techniques to support various screen sizes
- Created new UI layouts and sections from scratch based on design requirements and wireframes
- Identified and resolved front-end bugs, improving overall site performance and user experience

PROJECTS

Arogya

<https://github.com/Rubul-Tanti/Arogya-backend->

- Developed a responsive healthcare platform using React, Node.js, and MongoDB.
- Integrated features like blood donation, emergency SOS, fundraising, health blogs, and news updates.
- Designed intuitive UI with Tailwind CSS, ensuring accessibility and mobile-friendliness.
- Implemented secure user authentication and data handling using Express.js backend.
- Collaborated in a team to deliver a full-featured app within the hackathon deadline.

work management system

- I developed a corporate task management website using React, HTML, CSS, JavaScript, and TailwindCSS.
- The platform features two separate dashboards:
- Admin Dashboard
- Assigns tasks to employees
- Monitors task progress and statuses
- Employee Dashboard
- Views assigned tasks
- Updates task status to Active, Completed, or Failed
